Environmental Social and Corporate Governance (“ESG”) Investing

Hunt Capital Partners recognizes that its institutional investors are seeking to increase the social value of their investments to help further their ESG initiatives. An investment in affordable housing not only improves the living conditions of its residents, but it also helps to remove obstacles that stand in the way of creating a healthy, safe and stable home environment for low-income families and seniors. When families spend less on housing related expenses, they have more resources available for other essentials such as food and clothing, or even extracurricular activities and educational programs. One of the most significant benefits to providing quality affordable housing is an increase in an individual’s physical and mental health. Hunt Capital Partners’ affordable housing investments create a lasting effect on the people and communities they serve for generations to come.
